This coloring book contains black line drawings of many of the common feeder birds found on our Common Feeder Birds posters and in the slide sets included in the CFW curriculum. Both eastern and western species are represented.

Most of the pictures in this coloring book were drawn by the noted bird artist and ornithologist, Louis Agassiz Fuertes (1872–1927). Fuertes, a native of Ithaca, New York, and a Cornell University graduate, is known for his realistic bird art. Look for his signature initials: L.A.F. The other drawings are by William Motagna, signature initials: W.M.

These drawings are reprinted with the generous permission of the publisher, Comstock Publishing Company, Inc., Ithaca, New York.
